Environment Improvement Day

On Sunday, March 20th, the School Council Resources Committee organised the first Environment Improvement Day for the Year. We had an excellent response from our parents who we thank very much.

The jobs undertaken were:

- filling the large pot plants with soil so they can be planted out by the children,
- cleaned up the garden beds,
- planted the apple tree,
- sanded down and prepared the Art Room stools and tables for painting, and
- installed the additional planks of the vegetable garden beds.

Our appreciation goes to all the families for their efforts.
