On the 2\textsuperscript{nd} of June at 7:30 in the morning, the Year 4LC and 4AC classroom was abuzz with over 45 children who had come to school early to ask questions of students in a school in Colorado, USA. After we had a breakfast of cereal, fruit and some toast we were ready to start talking to the Year 5's from Sage Canyon Elementary School. They had just finished studying a unit on the Environment and we were keen to find out what their local environment was like. We wanted to compare the weather, native animals and the different flora.

Here are some comments from our students on their International Skyping experience:

- I enjoyed Skyping with Sage Canyon Elementary school in Colorado because I learnt a lot about them; they even had a pet guinea pig. - Minoli 4AC

- The thing I learnt was that at Sage Canyon Elementary school some of them have never seen a beach before, because they are in the middle of the USA. Bini 4LC

- I learnt by talking about their native animals in America such as goats, foxes and buffalo. IT WAS AWESOME. By Maddy 4AC

- I enjoyed having breakfast with Bini and then asking lots of questions with the other school. It was a little scary talking to people we didn't know, but it was lots of fun. Rajat 4AC.

- I enjoyed having breakfast with Hiruni and then asking lots of questions to the students. It was hard because of the time difference. Simran 4LC

- I learnt that they get to wear casual clothes to school. This is so different from our school uniform. Their winter is colder than ours and they get lots of snow. - Cassie 4LC

- It was great to see other people from other countries and I hope that we can do it again soon. It was lots of fun. - Abby 4LC
